**PRELIMINARY AMENDMENT<sup>01</sup> FC:202**

40.00 CH

Dear Sir/Madam:

In response to the Office Action dated June 8, 2000, please enter the following amendments and remarks.

IN THE CLAIMS:

Please cancel all pending claims, without prejudice, and enter the following new claims:

sub c' -61. A method for identifying an agent for treating an animal having a disorder characterized by loss-of-function of a patched gene, comprising contacting one or more test agents with a cell that expresses a wild-type patched protein and identifying test agents that change the level of patched inhibited intracellular signal transduction relative to the absence of test agent, wherein agents that cause a decrease in patched inhibited signal transduction are useful for treating an animal having a disorder characterized by loss-of-function of a patched gene.
